PROFESSIONAL SUMMARY

For the past two decades, I have gained vast skills and experience working in several creative fields including web design, graphic design, fine arts and now UX design and research. Having completed the UW-Madison UX/UI Design certification program, I am now prepared for a role as a UX Designer/Researcher. My skills include wireframing, user personas, journey mapping and high fidelity prototyping.

PROJECT EXPERIENCE

NIKE - SNKRS App Design

Develop a community App for Nike Enthusiasts to engage with one another.

- Performed UX Research using a variety of methods (surveys, interviews, card sorting, and user personas) to understand our clients' needs/wants.
- Developed a Style Guide using Figma to create a secondary, analogous color and typefaces for various content styles.

EARTH FIRST — UI/UX Design

Provide users with an online quiz to educate people about climate change.

- Performed UX Research (surveys, interviews) using Google Forms and DeScript to understand where changes need to come from.
- Created High Fidelity Design using Photoshop and Figma allowing users to perform quizzes with the goal of creating an educational platform on the effects of climate change and sustainable living practices.
